  - Experience in building responsive and user-friendly web interfaces , and I have knowledge in figma (UI/UX) design.
  - Ability to work effectively in a team environment and meet deadlines.
- 

## PROFESSIONAL EXPERIENCE

### MMN Company

October 2022 – Present

#### Frontend Developer

I am employed as a front-end developer at MMN, where one of my primary responsibilities is to implement user interfaces designed by our UI/UX designer. I meticulously code these interfaces with a professional structure, ensuring reusability and readability.

Additionally, I collaborate closely with the backend developer to establish a connection with the provided API. This enables me to efficiently receive and send data to and from the backend.

Furthermore, I am attentive to search engine optimization (SEO) requirements, actively contributing to the site's visibility and ranking on search engines.

Throughout my tenure, I have successfully completed various projects alongside my colleagues, including online stores, personal portfolio websites, service-oriented sites, and news platforms.

**Flipr Company**

**June 2022 - July 2023**

## **Fullstack Externship**

Built an employee management full stack web app used Docker and deployed on AWS ec2. I was the top performer in the program.
